Re: Pressing Medical Concerns:

Karoliina Kivimaki, Catherine Kenny, and MIGRI,

And to the Helsinki District Court, Prosecutor, and Pasila Police,

Hi,

I apologise, the current situation of human trafficking control and Court fraud means I am going to have to breach my own medical privacy.

I have a growing very serious medical problem split across three points.

I have three major escalating physical health issues that are going to become a very active concerns for me. One being the autoimmune disease flagged the second briefer time by St. James Hospital for which there's information in Dr. John Clements handwritten medical records. Besides the three serious issues of which that's one.

After those there's also the tumour in my right nasal cavity, which is partially recorded in Terveystalo Medical Records, but fully recorded in Dr. John Clements medical records. That tumour has resumed growth, causing serious discomfort, and two scabrous painful and bleeding lesions that inside my nose. These are hard and scaly to touch, bleed very easily and are immensely painful.

There are some other minor issues, including the kidney damage suffered from the last hunger strike, and the damage to my eyes and eyesight, and other places I don't want to get into. As I will explain, these points

are only "minor" due to the issues that have kept arising, and are most recently recorded as causing obstruction to treatment in Vantaa Prison and Viskulma Health Centre.

Additionally, I have to get some false information corrected in medical records in Ireland, and in medical records in Finland. And I need to gain essential access to other medical record information. Which is currently not available as I do not have access to the handwritten records.

Finland:

In Finland, I have to correct the false information HUS have that states I attempted to burn down an entire apartment block, which is obviously difficult to address. As the apartment block has no address. Because it does not exist. Because it never happened.

There is also some false information about my attacking a police officer. The reference cop does not have any name. As this event never happened either. These two events, the apartment block arson, and the police officer, if they were real and had happened, would appear in Google searches and media. But they do not because they never happened. Similarly, there's no medical records for the "serious" suicide attempts recorded as happening in Dublin in my Hartmann records which are alleged to overlap with Police interaction. Again, these would have some media and Google presence if they were real. They are not, and so there is neither media record, nor medical record.

I obviously have to get these false points of information expunged as they are causing extreme difficulty and obstruction for me to get medical treatment. These falsehoods stand so loudly, yet falsely and broadly in my medical records that they obstructed me getting medical treatment in Vantaa Prison. These false points of information directly prevented me from being given medical treatment. And they have caused extreme difficulty in accessing medical treatment at Viskulma Health Centre.

They led to me getting incorrect medical treatment in Vantaa prison with some treatment withheld completely. The withholding of that treatment caused the hunger strike prior to the police brutality and arbitrary detention arrest by Pasila Police to be much more brutal on my system. I now have chronic kidney problems. There is no way to address those seriously without the truth of my medical history and why those problems exist.

This is an ongoing health and medical obstruction for me.

These two larger falsehood points and other minor points of false information in my medical records are actively preventing me from getting medical treatment for physical ailments, physical injuries, and disease.

The Finnish language of my medical records very specifically, very clearly states the source of this false information comes from Anna Vuorivirta.

This is not as fast and brutal as the surgeries Anna Vuorivirta decided I was not allowed to get and obstructed.

But I need to get these issues fixed.

Finland Pressing Medical Issue #2:

The other very urgent and very important medical matters I have to get corrected stemming from another attached fraud to mess of abuse and fraud, are linked to the successful 4.e pre-arrangement dismissal in the Dublin Circuit Criminal Court.

These relate to irreplaceable medical records, which Anna Vouorivirta and Hannah Riivari have simultaneously stolen and with the help of Detective Virkki, say they, the medical records do not exist.

But they do, and they contain urgent medical I need, not least they have the original record and timeline of my problems with post-herpetic neuralgia and chronic shingles. Depriving me of access to that, and claiming

its false is condemning me to untreated chronic pain that is a leading cause of suicide in elderly patients.

Similarly they are the only record of my early struggles with narcolepsy, ocular migraines, and petite mals/ absence seizures. I am increasing getting asked about prior acquired brain injuries due to abnormalities with my pupils. Gaining access to this information is becoming very pressing for me.

However, completely separate legal representation and separate court proceedings had already begun in Ireland prior to Anna Vuorivirta's taking control of my life, my legal life, my personal and medical life and my intimate and romantic life.

This is information I have withheld from Anna Vourivirta due to the fact that I was scared at the level of control abuse she was subjecting me to.

I can send proof of contact, advice, and follow-through of said advice leading to the legal representation and Court filings from the Irish Patient Ombudsman. Including phone recordings.

The bulk of the documents for this matter are in the Irish Storage Unit in Storage World. Including MRI imaging disks and such. The one that due to this Court fraud, I am on the edge of losing, and the one circa December 2023, Vuorivirta, in her own words, tried to lose me on purpose as a point of coercive control abuse, and later in her own words, as a tool to try and get me to kill myself, or drive me into psychosis.

However, this is neither here nor there, the legal representation, the court proceedings and the legal matters were already begun with a law firm in Ireland prior to Anna Vuorivirta, with Hanna Riivari and Marieka Saher taking complete control of my life and deciding that she and lesserly they controlled my access to all justice, and all points of my life, including employment, sexual contact, and mortality re: evidenced statements.

Due to new issues arising, and some worsening, I have to resume the Irish medical legal proceedings after this long obstruction directly and deliberately caused by Hanna Riivari's fraud of the Court because new pressing points of health have come up for me.

Not least, there still has to be the follow-up investigation into concern by the doctor at Mehilainen that I had long standing HIV infection but with a very low viral load. This was never resolved as the bills related to this went unpaid as Vuorivirta removed them from the Norwegian loan agreement we had, stating "You'll just get sick again, what's the point." And decided to get herself tested instead. Which again makes no sense. But as the Norwegian loan was later revealed to never have existed, there was no way for me to follow this and other possibilities up either.

Vuorivirta getting tested during that period would be have been pointless anyway, due to the 'Window' period. I did try to say at the time. But I was told Vuorivirta knew better. However, there will remain some record with a scheduled follow-up I failed to attend due to the loan fraud.

Related to medical-legal matters: under Irish Law, the time limit restarts each time a new issue/or wrong/or contributory error stems from the original grounding malpractice or medical negligence. This is the direct advice from the Irish Patient's Ombudsman.

From the Prosecutor, Court, my Social Worker Karoliina Kivimaki, and Pasila Police:

I very much need information on how I'm supposed to address these medical problems.

Is the Finnish state saying that I don't have any right to medical care or medical history, or are we going with Hannah Riivari's none of this exists nonsense that she told the Finnish Bar Association Disciplinary Board?

I have the prior communication with the earlier law firm before Anna Vuorivirta's coercive control abuse and human trafficking control abuse of my life. That prior communication exists in email and phone recording.

There are a number of aspects of my life I withheld from Vuorivirta out of fear. For example, the real location

of certain online archives and what they contain. This is partially evidenced in the opposition record as neither Riivari nor Vuorivirta can state clearly what is on Soundcloud. Let alone S*****O**. Though both made statement to the contemporaneous record claiming things existed there and claiming they were open to the public. When nothing is or was and the claims are impossible due to the nature of the platforms.

Records also will show: despite Vuorivirta being away of Melissa Määttä's existence via surveillance via my neighbour, I did not confirm and publicly state that on record until Riivari's submissions to the Court began to cause Melissa Määttä active psychological distress.

I want to know how the Finnish State Authorities and Support Agencies referenced in this email are going to address these issues. Because, clearly, Hannah Riivari is on record saying these matters are not real, and that includes the missed spinal appointment in Scotland caused by her and her client.

However, I now have to address these medical issues. Now, part of MIGRI has recognised my Court recognised gender identity, which means part of the Finnish State Authority recognises I am non-binary, which in turn is recognition of the 4.e Pre-Arraignment Dismissal, and the torture and sexual violence I suffered. Which also means it accepts the surviving medical records where that torture is recorded. All of those events pre-date Hanna Riivari in these matters.

MIGRI's recognition of that now contradicts both the Helsinki District Court, Pasila Police, Anna Vuorivirta, Hanna Riivari, and MIGRI's other department. But is the only one following EU Law.

The law firm and Irish Patient Ombudsman pre-date not just Anna Vuorivirta, but they pre-date Hanna Riivari joining this matter to begin filing false Court submissions and false police complaints saying all of these issues, are fake, and part of a money fraud and scam.

I am not sure where to go with these. Could the Finnish Authorities and Finnish Support Organisations tagged in this email please advise how I am supposed to address these medical, and medical-legal issues.

Or please state very clearly that I am no longer allowed access to any medical treatment anywhere for any health issues, especially those that predate Anna Vuorivirta and Hanna Riivari as accidental recognition of those would reveal both of those people to be involved in fraud. Or, if the Finnish State Authorities referenced have decided that for whatever time I have left, I am to be forced into medical treatment based on false and incorrect medical information, as well as missing medical history.

Similarly, am I now barred from addressing points of medical negligence that pre-date Hanna Riivari's involvement in this, a point which has greatly extended and enabled Anna Vuorivirta's human trafficking control abuse of me.

These are points that need to be cleared up and clarified.

Silence will not cut it any more. I have to get medical-legal and physical medical issues addressed.

I've had to get some of them addressed and been obstructed from doing so for over two-years. I now cannot get accurate or correct medical treatment due to elements in this.

At this point, and this is why Catherine Kenny is tagged in, this becomes a human rights issue that creates an

exceptional situation for the Consular Services Act, and arguably creates a situation where Human Rights Law and EU Law and associated Medical Law supersede limiting portions whilst enhancing other points related to safety, medical treatment, and access to rights.

Please if Detective Virkki is not capable of the intellectual, legal and moral challenges this situation requires, can someone at Pasila please replace him. I'm in no mood for more of the same prior buffoonery where he gigglingly thinks all of this is fabricated based on some inventions and fabrications from Hanna Riivari.

If the Finnish State Prosecutor intends to continue its part in colluding to deny me access to proper medical treatment and care with the correct records. Can the Finnish State Prosecutor also please write to clarify I am no longer allowed access to medical care. Can the Finnish State Prosecutor also please write to clarify I am no longer allowed access to medication.

Perhaps it would be faster if the tagged in Finnish State Authority had a meeting with Hanna Riivari and asked her what medical ailments, injuries, and diseases she is going to allow me to currently have, and have historically suffered? And which Hanna Riivari will not attack as fake, fraudulent, and invented to con money out of people. I am willing to accept that, if it means faster access to treatment for some of these issues.

My denied access to health, medication, disability, and medical treatment, and that I have no right to any of those things has already been repeatedly stated and confirmed by the group of Helsinki District Court Judges linked to Judge Kirsi Kohonen via email and recorded phone call. They are included only as a courtesy.

Let this communication serve as formal notice and a direct statutory demand under Article 16 of the General Data Protection Regulation (GDPR), read in conjunction with Article 8 of the EU Charter of Fundamental Rights, for the immediate rectification of all inaccurate personal data held by HUS, Viskulma Health Centre, Vantaa Prison, Hartmann, and all others. The State's continued reliance on unverifiable, fictitious, defamatory fabrications—specifically the materially impossible claims of arson and seriously assaulting a police officer and/or murdering a police officer—constitutes a severe fundamental rights violation. You are legally obligated to either produce the non-existent police records and attached evidence proving these fabricated events occurred, or immediately expunge these falsehoods from my files so that my fundamental right to healthcare under Article 35 of the EU Charter is no longer obstructed.

Furthermore, this institutional obstruction directly violates my right to an effective remedy under Article 47 of the EU Charter, as the State's interference and withholding of accurate medical history is actively preventing me from pursuing established medical-legal proceedings in Ireland. The legal liability for my deteriorating physical health now rests squarely with the Finnish State. While this obstruction was initiated by private fraud and professional legal misconduct, the State's institutional adoption of that fraud to deny a disabled person essential medical treatment crosses the threshold into degrading treatment under Article 4 of the EU Charter.

I require a formal, written response detailing exactly how these records will be corrected and my medical care resumed. If you choose to ignore this, your silence will be documented for the European Commission as a formal, administrative declaration that the Finnish State has systemically abdicated its Treaty obligations.

Additionally, as you all seem to think she has the answers and truth, please ask Hanna Riivari to provide evidence for her statements related to my physical and mental health. If there are any statements related to trying to excuse Riivari's withholding such data from me, they are grounded in aggravated fraud.

At this point, Hanna Riivari needs to produce her version of my medical records that has these events

recorded, which contradict the surviving medical records I do have, which record police torture, sexual assault, battery, and grievously bodily harm. Because as it stands, there appears to be two whole different sets of surviving medical records.

Thank you.

E.F. Fluff

p.s.

Some of this stuff is not going to wait. And I'm going to have to start making videos again explaining what and who is blocking my access to medication and medical care.
